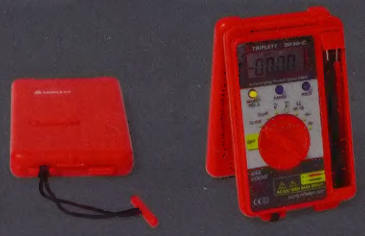
industry leading products from:

TRIPLETT

Legendary Quality in Test Equipment



Pocket-Sized DMM

- 3 ¾ digit, 4,000 count display
- Auto / manual ranging
- AC/DC volts to 600V
- AC/DC current to 400mA
- Resistance to 40MΩ
- CAT II 600V rating on voltage ranges
- Capacitance test to 100µF
- Frequency range to 10KHz
- Diode check
- Continuity beeper
- Auto power-off
- Low battery indicator
- One year warranty

WireMaster Coax

- 8 remotes with BNC connectors included
- Tests for "opens" and "shorts"
- AC/DC overvoltage warning LED
- 120VAC Line Cross Protection
- Real-time test helps identify intermittents
- Power Latch Function Switch to prevent accidental turn-ons
- Use to identify coaxial cables in CCTV Security and Surveillance systems, Broadcast TV, Residential Video systems, and Cable TV (with F adaptors).
- One year warranty

Triplett TDR

- Find cable length or distance to fault from ONE END!
- Low cost digital cable length Meter/TDR
- Built-in tone generator for cable tracing & Identification
- Simple operation with automatic distance display
- Compact, ergonomic design, weighs less than 8 oz.
- Padded Cordura holster included
- Three year warranty

* Free to approved operators

PPC®
The Power of Innovation ®

The EX Series Universal Connector

What type of cable is this?

Installers are faced with the problem of identifying old unmarked cable and having to guess on which connector is the best match. This results in unnecessary service calls due to the use of the wrong connector/cable type.

The EX® connector was designed with the challenging requirements of IP Telephony and Hi Speed Data. The unique patented design with compliant co-polymer body achieves true universality across all cable braids.

Features

- Moisture-tight Patented Design
- Universal on 60% to Quad cable
- 1 Piece Construction
- Physically Contoured Parts for Easy Size Identification

EX6 For RG6

EX59 For RG59

CMP Series

Compression Connectors

PPC's CMP Series (US Patent # 5,470,257) presents a high value, cable-specific compression connector solution. The CMP Series is designed to fit 60%, Tri-shield, and Series is designed to fit 60%, Tri-shield, and Quad cables. CMP connectors are also compatible with industry standard tools.

Features

- Rugged, precision-machined, nickel-plated brass body and nut construction
- DupontDelrin color-coded polymer compression sleeve
- Excellent moisture sealing even with marginal craftsmanship
- 1 Piece Construction
- Compatible with weather seals PPC P/N WS 375 and WS 500

Part Number

CMP59 For 59 Series 60% & Tri-shield cable (Red Ring)
CMP59Q For 59 Series Quad cable (Purple Ring)
CMP6 For 6 Series 60% & Tri-shield cable (Blue Ring)
CMP6Q For 6 Series Quad cable (Black Ring)

Accessories:

WS375 Weather seal
WS500 Weather seal
MS716 Metal Shield
ST716 Security Sleeve Wrench

Satellite Expo 2005 the First of its Kind

By Lesley Kolb

It's back ... sorta.

The satellite TV business has been without a large annual event for years. After the last **Satellite Broadcasting and Communications Association (SBCA)** show was held, retailers, installers, distributors and others had no place to chat about business, hear from industry leaders, take the latest education courses, and try out new products and services.

The Satellite Expo and Training Conference 2005, commencing June 23 in Memphis, hopes to become that big event for the satellite TV business ... and so much more.

And Satellite Expo is the only consumer satellite show open to the entire industry.

This year's event, which will be held at **Agricenter International**, has some reminiscing about past SBCA shows. But those past conferences have had quite a different spin than this year's Satellite Expo and Training Conference. "Early SBCA shows were really about getting something done, but toward the end, they got really political," says Show Director *Lee Gilliland*.

In the past, attendees got really excited about SBCA shows because they were able to accomplish their goals and meet other people in the industry. But when industry soap operas began to surface at the conferences, excitement decreased.

This year, every attempt was made to keep the politics out of the show in order to maximize the event's efficiency and success. That doesn't mean the big topics of the day won't be discussed by speakers and attendees. But you can bet the producers of the Expo are working to keep distributors, retailers and vendors happy.

Every booth will have a manufacturer or distributor onsite. With this idea as a frontrunner for the event, Gilliland believes this show will bring in a broader audience and make the event significantly more successful than similar shows held in past years.

Gilliland says there have been a lot of folks working on this event to make it successful, including exhibitors, who he says have been extremely flexible, as well as the decorator, who has been doing trade shows like this for years and is working to make the venue look incredible.

Training classes also will be held at the Expo. Courses in VSAT, business management, scheduling, FTA systems and MDU installation are just some of the courses offered. These classes are taught by qualified instructors.

Gilliland is quite happy with the way things are turning out for this year's show. People are coming from all over the world to see a first-class conference that could not have been created without the exhibitor and attendee support.

Gilliland says, "We are grateful for the attitude of the exhibitors and the attendees. We are super duper excited about putting on a great show for years to come. We want to thank everyone for their support and we are excited about the show."

BEST OF THE BRIDGE

DATA YOU CAN USE ON DVRS, SUBSCRIBERS AND MORE

Welcome to the best of The BRIDGE. Here you'll find a selection of data points designed to help you in your business.

For those who are not familiar with it, The BRIDGE is a weekly pdf publication from **Media Business Corp,** publishers of SkyREPORT, SkyRETAILER and other key media industry news sources. The BRIDGE offers a unique view of the entire picture – not just satellite, or just cable, or just telcos or cellphones – but the whole array of media businesses competing for consumers' time and money. In The BRIDGE, we look in-depth at the trends and innovations that impact all these media players ... and we offer research designed to provide the kind of information that can help shape successful business plans.

The BRIDGE is a free, ad-supported publication. To subscribe, simply go to http://www.mbc-thebridge.com.

In the meantime, enjoy this sampling from the last few months of The BRIDGE issues.•

Satellite's Edge

Okay, so digital video recorders didn't take off with the rocket flare expected by many observers. And they aren't unique to DBS providers.

Still, DVRs are multiplying rapidly, and consumers who have them profess love to the point of obsession about the products. And when it comes to DVRs, satellite has the edge.

A recent study by **Ipsos-Insight**, found that satellite is actually gaining among consumers who purchase their DVRs. As shown by the top chart on this page, an early 2005 survey found that 30 percent of those who had purchased the digital recorders did so from their satellite providers. That's up by 13 percent over 2004 – and it puts satellite definitely in the lead for DVR sales.

What does it mean to the satellite retailer?

Put those DVRs front and center in the store. Dress them up with a few quotes from satisified customers. Maybe offer discounts to those who purchase two or more DVRs. You know DVRs are popular, so make that work for you!

Now, how much education will be needed for new DVR buyers?

Less and less, according to the Ipsos-Insight survey. Overall awareness of DVRs has spread to more than 75 percent of the population. And satellite subscribers are among the most knowledgeable. According to the data, approximately 80 percent of satellite subs have already fixed DVRs on their personal radar. All of which suggests that a smart retailer might want to scour customer lists for DBS buyers without DVRs ... then call them up with an offer!•

Welcome Breakfast & Keynote Speech by Bob Howell

Sponsored by GlobeCast World TV
June 23, 8:45 AM -- 10:45 AM
Style: Banquet Style
Location: "D" Wing

Bob Howell

This two-hour breakfast and welcome to the show is the highlight of the day. Delivering our keynote address will be Bob Howell of the Winegard Corporation. If you are interested in where the industry is going, Bob has the ability to point out the directions. Pre-Registration is Required for the breakfast portion of this event.

Dealer Appreciation Party

Sponsored by SPAUN/USA
June 25, 8:00 PM
Pre-Registration is Required
Location: Park Place Hotel

The show is over but the party is just starting! Enjoy the music of Transitt, the world famous BBQ from Corky's and plenty of beverages as our way of saying **"Thanks For Coming To Satellite Expo 2005."** This party will also serve as the "kick-off" to Satellite Expo 2006.

The Diversity Factor
"The Satellite Technician's Key To Success"

June 23, 2:30 PM - 5:00 PM
Style: Forum
Location: "D" Wing -- Capacity 700

Speakers to include:

Chuck Hewitt, Industry Consultant, past SBCA President
J.R. Stallings, Owner DE&S and Member SBCA Retail Council
Blair Gilbert, VP Satellite Networks-Telkonet
Dave Wheeler, VP Pace Electronics, Inc.
Buddy Davis, Davis Antenna

This powerful forum can impact the bottom line of the satellite professional more than any other single event of 2005. Moderated by noted satellite industry consultant and past SBCA President Chuck Hewitt, The Diversity Factor will clearly define what the satellite dealer/retailer must accomplish in order to stay in business for the long haul. Some of the "heavy-hitters" of the satellite and communications industry will speak on the subject that matters most to your business ... your bottom line, and how to increase it.

June 22nd

9:00 AM - 5:00 PM

Commercial DirecWay Training & Certification

Pre-Registration and Fee Required
Location: Park Place Hotel
Fee: $149
Host: National Communications Contracting

Training will include: DW4020, DW4010 and DW4030 all of which are commercial VSAT installaions. To attend these classes you must bring your own laptop with Windows 98 or newer operating system that has a working Ethernet port and your own Cat V jumper. These classes are limited to the first 25 people registered for each class. Upon completion of this course the dealer/technician would be certified in DirecWay and eligible to receive HNS Commercial Installations through National Communications Contracting. To learn more about HNS visit www.hns.com. To learn more about National Communications Contracting visit http://www.ncc-usa.com. Note: You may attend all three training/certification classes offered by NCC for only $399.99.

9:00 AM - 12:00 PM

Telephone & Residential Structured Wiring Systems

Style: Classroom
Note: This class is offered twice. The second class is Saturday, June 25th at 12:30 PM.
Location: Park Place Hotel
Fee: $99 -- Pre-Registration and Fee Required
Hosted By: J.R. Stallings/Noted Trainer & Owner DE&S

An overview of telephone techniques and practices with emphasis on the proper tools and techniques all technicians should have in today's structured wiring environment. Introduction to network wiring and coax within these systems and the alternatives a technician can employ to provide a multitude of profit opportunities. Instructor: J.R. Stallings Owner DE&S & noted trainer.

9:00 AM - 5:00 PM

WildBlue Training & Certification

Special Registration Required
Note: This class is offered three times. This is the first class.
The second is Friday, June 24th, and the third class is Saturday, June 25th.
Location: Holiday Inn Select (The other class will be held at Expo facilities).

DSI has joined with Satellite Expo 2005 to bring you WildBlue installation training and certification. The certification event is only available to DSI customers in selected states who are attending Satellite Expo 2005. To register for this course, you must provide your DSI Dealer Account Number, and the Expo Registration Number you received when you registered to attend the Expo. You must have a valid admission pass for the day of your training.

Exception: For Wednesday's class, you will need at least a single day admission pass for any of the three days Satellite Expo 2005 is open.

The information on this form is provided to DSI. DSI will contact you for scheduling, and to make arraingments for the $199 class fee. Each student must pass an online exam prior to attending this event. If you have any questions please contact your DSI Account representative.

June 23rd

8:30 AM - 11:00 AM

Welcome Breakfast & Keynote Speech by Bob Howell

Presented by GlobeCast World TV
Style: Banquet Style
Location: "D" Wing

This two-hour breakfast and welcome to the show is the highlight of the day. Delivering our keynote address will be **Bob Howell** of the Winegard Corporation. If you are interested in where the industry is going, Bob has the ability to point out the directions.

CableNow Corp. LLC

Booth 78
3511 Silverside Road #105, Wilmington, DE 19810
(302) 351-6219

CableNOW Corp provides value-added data services and channels for private cable systems. Dealers and operators may earn generous profit margins. Products include NOW Weather, a local weather channel used in conjunction with the standard weather channel providing local conditions, forecast and local radar because the digital satellite feed of The Weather Channel (TM) does not provide local information. GuideNOW provides a customized on-screen program guide designed for the specific cable system. I-NET NOW is a turnkey high-speed broadband solution allowing dealers to install and operate DOCSIS cable modem service comparable to that of franchise cable. Monthly residual commissions are paid to dealers on all services.

C.A.S.E, Inc

Booth 92
1879 Portola Rd., Ventura, CA 93003
(866) 865-8731
http://www.case-inc.com

By providing top service, quality components and forecasting for our customers, we will become more than just another distributor; we will become a valued partner that will have broadband installation products in stock when our customers need them.

CCS Corporation

Booth 25

http://www.ccscorporation.net

Since 1977, CCS Corporation has offered component level repair services on all types of satellite receivers and cable set top boxes. Refurbished products are available. We also function as a full service depot, servicing clients on a national basis.

Centronic Wholesalers, Inc

Booth 116
Contact: Tony Pelura
325 Log Canoe Circle, Stevensville, MD 21666
Tel: (410) 643-8353 Fax: (410) 643-6387
http://www.centronics.com

For over 40 years, Centronics has been a leader in the distribution of satellite and antenna products. We are an import manufacturer and distributor of DBS, off air, and consumer electronics. We supply many items, such as wire and cable, TV mounts, and A/V connectors to contractors, installers, and retailers. We stock and distribute product by trusted manufacturers such as Winegard, Spaun, VMP, Commscope, Connexions, Speco Technologies, and CWI.

Chelton, Inc

Booth 124
1955 Lakeway, Suite 200, Lewisville, TX 75057
(972) 221-1783
http://www.Cheltoninc.com

Founded in 1982 to provide marketing, distribution, and technical support to North American customers, Chelton, Inc. has established Chelton presence in the commercial and military aerospace/antenna community. Our success is based on helping customers understand and solve their antenna needs as well as in guiding our manufacturing affiliates to develop customer products that satisfy specific program requirements. Our partnership with the OEMs that manufacture the platforms and radios have the unique ability to anticipate design features that are key to current and future needs.

Comatek

Booth 11
(512) 773-0028
http://www.DishStand.com

The T-pod is the first and only FCC compliant satellite dish stand designed for the multi-dwelling unit (MDU) market! No more FIGHTS with leasing management, no more MIXING CEMENT (and waiting for it to harden), no more WRESTLING with a tripod and no more ANCHOR CABLES! The T-pod offers an INSTANT setup solution for satellite retailers or installers. The T-pod is the cheapest, quickest and simplest solution for increasing sales in the highly prized MDU market!

CommDeck

Booth 50
2715 Hogarth Street Suite 4, Eau Claire, WI 54703
(866) 367-7782
http://www.RSTCEnterprises.com

RSTC Enterprises was established in response to the consumer's need for a network solution that would accommodate future satellite technologies, when building a new home or commercial development. Homebuilders, low voltage and installation contractors alike have struggled to meet the explosive consumer demand for satellite service. In 2003, the founders of RSTC Enterprises began collaborating on several new product ideas for satellite mounting equipment. Drawing from their various contracting experiences in the cable, satellite and construction fields, the partners set out to find a way to incorporate satellite option into existing building practices. The CommDeck Dish Mounting System is one of the results of those efforts.

Componexx Corporation

Booth 127
4572 N. Hiatus Rd. Sunrise FL 33351
(954) 572-8229
Email: edwindiaz@componexx.com

Componexx products utilize a building's existing satellite TV network to combine data creating a new broadband network without having to install new cables. Componexx also offers OEM solutions for satellite, CATV and telephone data components of 1 GHZ/2GHZ/3GHZ including splitters, taps, multiswitches and structural wiring.

Corning Gilbert, Inc.

Noahtek Eng Co., LTD

Booth 140
#994-16 Dongchun-Dong, Songdo Technopark, Incheon Free Economic Zone, 406-130, Korea
82-32-851-5000
http://www.Noahtek.co.kr

Jaysat H500 is undoubtedly the most innovative and discreet satellite broadcasting flat antenna, because it can be installed regardless of the targeted satellite coordinates. Jaysat H500 shows outstanding performance installed in parallel, on the wall or balcony, regardless of facing satellite from direct position. It can be optimally used in moving vehicles as maximum reducing random height and main beam tilting up to 45 degrees with no gain loss. Jaysat H500 will be a great solution to installation where you would have problems with a traditional parabolic antenna.

SDA

Booth 93
5 Depot Street, Greencastle, IN 46135
(800) 288-3824 or (765) 653-8262
http://www.eta-sda.org/sda/

SDA is a not-for-profit association of independent satellite system retailers, repair centers and installers governed by four elected officers, as listed on the SDA Officers page. SDA provides a forum for the exchange of business and technical information by conducting seminars at the NASC each year and providing technical training conferences for technicians and installers. SDA Subject Matter Experts serve as the nucleus of the Satellite Systems Installer certification committee. They collect information required for satellite personnel, construct the Competencies for training future satellite systems workers and produce the Certified Satellite Installer examinations, as well as the tests for the SMATV, commercial, antenna, and C/Ku dish systems endorsements. SDA has served as the representative for satellite workers within the Certified Service Center all-industry consortium; the International Certification Accreditation Council, and at numerous conferences of state and national educational institutions. SDA operates from the headquarters of the ETA-I, Electronics Technicians Association, International, in Greencastle, Indiana. Inquiries may be addressed to eta@eta-i.org. Or call: 1-800-288-3824.
